

5.7 837P (ASC) Professional Claim Submissions - Freestanding ASC (FASC)

This section provides additional detail about the file submission and specific characteristics about the file and file expectations. Review of this section will help the technical advisor, vendor or developer create the custom 837 claim file and format it according to WHAIC specifications. If you follow these guidelines, the file will process accurately, efficiently and with minimal edits.

Although this manual is intended to serve ASCs, some ASCs prefer to program the file using the 837I or 837R format, see the full hospital manual for those details. This document references the 837 Professional Health Care Claim – ASC X12N 837 (005010X222A1)

837P sample file: https://www.whainfocenter.com/WHAInfoCenter/media/DataSubmitters/837P_SampleFile.pdf

The 837 Wlpop claims file **does NOT have file extension** requirements.

○ INTERCHANGE CONTROL HEADER (ISA06)

WHAIC manages two data submission environments - one for test and one for production, therefore the data submitter is choosing the environment; the use of the ISA15 segment is not necessary or required.

An uploaded 837 file must contain data for only one facility. The facility number in ISA06, GS02, and NM109 in loop 1000A must all match the facility number specified when the file is uploaded. In other words, if the user specifies that the uploaded file is for facility 043 (Aurora - Hartford) but the file contains data and field identifiers for facility 124 (Aurora - Sheboygan), the file will be rejected.

○ DELIMITERS IN THE SEGMENT OF THE FILE

A delimiter is a character used to separate two data elements or component elements or to terminate a segment. The delimiters are an integral part of the data. **Delimiters are specified in the interchange header segment, ISA.** The ISA segment can be considered implementation compliant with this guide to be a 105-byte fixed length record, followed by a segment terminator.

- the data element separator is byte number 4;
- the repetition separator is byte number 83;
- the component element separator is byte number 105; and,
- the segment terminator is the byte that immediately follows the component element separator.

Once specified in the interchange header, the delimiters are not to be used in a data element value elsewhere in the interchange. For consistency, this implementation guide uses the delimiters shown below in Delimiters Table, in all examples of the EDI transmissions.

File Delimiters

Character	Name	Delimiter
*	Asterisk	Data Element Separator
^	Carat	Repetition Separator
:	Colon	Component Element Separator
~	Tilde	Segment Terminator

The use of the following special characters should be used within the claim data as defined below.

Period	Dash	Colon
.	-	:
Ex: Charges 111.11	Ex: source of payment, ex. AAA-01	Ex: Race:Ethnicity DMG05 value of 5:2:3 is treated as Race = 5, Ethnicity = 2, Race2 = 3

○ [837P \(ASC\) PROFESSIONAL CLAIM SUBMISSIONS - ASCS](#)

This section applies to freestanding ambulatory surgery centers (FASC/ASCs), with a three-digit ID in the range of 200 or 400 [Appendix 7.1](#). FASCs are required to submit selected items or aggregation of items on all ambulatory surgeries, **including records of self-pay patients**. Most of these items are located on the National Uniform Claims Committee (NUCC) or CMS-1500 claim form.

This document notes the loops and elements relevant to WHAIC Data Collection. It is not intended to serve as a complete 837 reference, not all requirements for a valid 837 file are specified. *See the main 837 Companion Guide and Tech Specifications Manual ([Hospital Manual](#)) for the 837I and 837R specs.*

Fields defined, created, or added by WHAIC from the 837 claims file

Patient Type (outpatient surgery)	Type of Encounter (Outpatient = 2)	Place of Service = 1
Principal Procedure on OP Records	Principal Procedure Date	Additional Procedures on OPS records
Principal Procedure Modifier(s)	Additional Procedure Modifier(s)	

Legend

Name	Field	Description
R	Required	Data Element Must be Submitted for the data type and must not be blank.
S	Situational	Required based upon values in the claim/EMR or other elements.
O	Optional	This element is not required and may be left blank, however, if submitted, it will be edited.
Gray shade	Blank	data is not stored, but may be sent, and may or may not be used to route data in Wlpop

837P Crosswalk and Wipop Map - Summary Table of required elements

Additional Elements supplied and not mentioned in this document will be discarded by WHAIC prior to processing.

[837 Professional Health Care Claim](#) – ASC X12N 837 (005010X222A1) | [Download Sample 837 P File](#)

Loop	Element	Field Description	R, S, O	Values/Mapping Comments	Wipop Name / Notes
0000	ISA06	Interchange Sender ID (3 digit)	R	Use 3-digit Facility ID assigned by WHAIC. Example: Osceola Medical Center is '102' WHAIC Permanent Facility ID - Appendix 7.1 Facility List	All claims must be from the same facility. Must match GS02 & 1000A/NM109
	ISA08	Receiver ID	O	Submitter choice: leave blank or use WHAIC837	
	GS02	Application Sender's Code	O	Use 3-digit Facility ID assigned by WHAIC. Example: Osceola Medical Center is '102' WHAIC Permanent Facility ID - Appendix 7.1 Facility List	All claims must be from the same facility. Must match ISA06 & 1000A/NM109
	GS03	Application Receiver's Code	O	Submitter choice: leave blank or use WHAIC837	
0000	ST03	Implementation Guide Version	R	005010X222A1	Req but not stored.
